KEY FEATURES

FULLY ENGINEERED: DECKED is engineered with a galvanized steel skeleton in-molded to High Density Polyethylene (HDPE)

STRENGTH-TO-WEIGHT: 2000lb payload, 200lb per drawer capacity at an overall weight of 200-230lbs

CUSTOM FIT: Each DECKED system fits your bed like a glove. CAD engineering data is used to match the sidewall topography of your truck bed

EASY TO INSTALL & REMOVE: DECKED attaches to bed tie downs and cargo attachment points with little to no drilling of the vehicle required for easy installation and removal/replacement

RECYCLED MATERIALS: 100% recycled (HDPE) and American steel

MADE IN USA: Engineered in Detroit, manufactured in Ohio

ERGONOMIC: Drawers roll tools and other essentials out at waist height in the "power zone"

WEATHERPROOF & DURABLE: Drawers keep contents dry and out of the elements. (HDPE) is impervious to the elements and unaffected by solvents, lubricants and other chemicals

SECURE: With the tailgate closed and locked, drawers are inaccessible and unable to be opened

FULL BED USE: By raising the bed floor of the vehicle over the wheel wells, the 2000lb load rating makes the entire footprint of the bed available for carrying loads on a single flat surface

CUSTOMIZABLE STORAGE: We've developed a full collection of accessories to help you get more out of your system. DECKED is also compatible with a variety of integrations such as crossover toolboxes, ladder racks and cargo slide systems
